About Me

From the moment I produced "Hello World" in the console of my first application, I knew I was hooked into the world of software development. But software development has never been "just a job" for me, it's offered an engaging challenge to continually learn and improve my skills in creating high quality software. What started with a simple "Hello World" has become a full-fledged passion that only gets more exciting as I go by.

Technical Skills

Skills: HTML, CSS, JavaScript, React.js, jQuery
Platforms and Framework: Bootstrap, Materialize, Jest, GraphQL, Heroku, GitLab
Databases: MongoDb, MySQL, NoSQL
Skills I am learning: WordPress and TypeScipt

EXPERIENCE

Toolin' Around — *Link to Github* **|** *Deployed Application*

- Toolin' Around is an application that allows neighbors to borrow tools from each other with ease. This is a *backend application* that utilizes Express.js, MySQL, Nodemailer, Bcrypt, JavaScript, Node.js, Sequelize, and Materialize. This was a collaboration application.

Charlie Cu Tattoo — *Link to Github* **|** *Deployed Application*

- You know exactly what you want your tattoo to be. You just have a genius idea inside your head but you're not sure how to even express what you want it to look like. This application showcases the artist's latest work and style of tattoo. This application utilizes HTML , CSS and Bootstrap.

Password Generator — *Link to Github* **|** *Deployed Application*

- Password Generator is an application that creates secure passwords that are impossible to crack. This application utilizes HTML, CSS and JavaScript.
